

EH Series Ergonomic Seating

A new generation of Eurotech ergonomic seating designed for today's workspaces - with the EH5 introduced as part of the new EH Series in 2026.

NEW FOR 2026

Meet the EH Series

Eurotech introduced the EH Series at NeoCon 2026 as part of its newest ergonomic seating lineup. The family is positioned around supportive, highly adjustable seating for focused work, private offices, shared workstations, and other environments where day-long comfort matters.

The EH5 is one of the newly introduced models in the family. This overview is intentionally price-free and designed as a customer-facing product handout.

Ergonomic Support

Designed to support healthy seated posture and user comfort throughout the workday.

Workday Adjustability

A task-oriented seating concept built around fitting the chair to the individual user.

Modern Workplace Fit

A contemporary aesthetic suited to corporate offices, home offices, touchdown areas, and shared workspaces.

WHY EH?

Comfort

Built for the way people sit, move, and work across a full day.

Adjustability

A user-centered approach helps support a more personalized seated experience.

Performance

A professional seating family intended for demanding everyday workplace use.

EH5

The EH5 is part of Eurotech's new EH Series and was previewed ahead of NeoCon 2026. It brings the family's ergonomic focus into a contemporary task-chair format intended for modern work settings.

Designed around the user	A versatile choice for
The EH5 is presented as part of Eurotech's newest ergonomic seating direction. For customer presentations, the strongest story is its combination of workplace comfort, personal fit, and a clean professional appearance.	• Individual workstations • Private and executive offices • Hybrid and shared work areas • Home-office environments • Ergonomic seating programs

SPECIFICATION & SELECTION

Choose the right configuration for the project

Because the EH Series is newly introduced and Eurotech's live product pages are dynamically updated, final model dimensions, mechanisms, finish options, upholstery/mesh selections, certifications, warranty terms, and available configurations should be confirmed from the current manufacturer specification before ordering.

- 01

Fit: Match the chair's adjustment range to the intended users and workstation.
- 02

Application: Consider daily sitting duration, shared use, and the type of work being performed.
- 03

Finish: Coordinate frame, mesh/upholstery, and base selections with the surrounding workspace.
- 04

Current specs: Verify the latest manufacturer data for the exact EH model and configuration.
