

Contour

Where Curves Count

Versatility Without Limits

Contour offers unmatched flexibility and functionality across its full range of configurations, including curve, wave, linear, pods, and angle designs. With 100's of pre-configured variations, the system accommodates packs of 2 to 8 units, two height options, two widths, and multiple power configurations. It also features 8 unique accessories—such as a coat hook—and 39 refined finishes.

Boosting Productivity Through Organic Design

Contour is more than just a workstation; it's a catalyst for enhancing productivity through its thoughtful use of organic shapes. Recent studies have shown that office environments designed with natural, flowing forms contribute to reduced stress and increased focus, directly impacting employee productivity. The ergonomic curves of Contour not only provide superior comfort but also create a more inviting atmosphere that minimizes visual distractions and fosters a sense of calm.

Maximizing Space Efficiency with Innovative Design

In addition to boosting productivity, Contour's design maximizes space efficiency. The workstation's organic shapes allow businesses to fit the same number of employees into a space that's up to 30% smaller than traditional layouts. This efficient use of space frees up additional areas within the office, which can be transformed into collaborative zones that enhance team interaction and improve workflow.

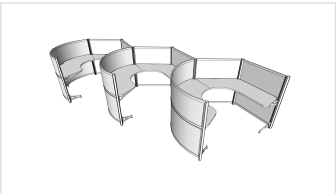

Typicals

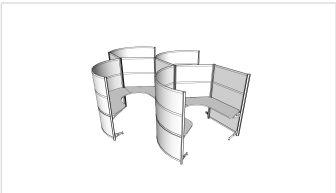

HCC-02
Contour-Curved Stations, Fixed,
48"H, 2 Pack

HCL-03
Contour-Linear Stations, Single-sided,
Fixed, 48"H, 3 Pack

HCA-03
Contour-Angle Stations, Fixed,
48"H, 3 Pack

HCA-19
Contour-Angle Stations-Double Sided,
Fixed, 67"H, 4 Pack
