

Mix

Divide. Define.
Done.

fluidconcepts

Move It. Change It. Make It Yours.

Designed for spaces that don't sit still, MIX screens are easy to reposition, reconfigure, and scale as needs shift. Connectable, mobile, and available in a range of heights and formats, they adapt effortlessly—from quick touchdown zones to fully defined team areas. It's flexibility without friction, so layouts can change as fast as the work does.

Lightweight Feel. Heavyweight Impact.

A mix of materials, from acoustic panels to clear or frosted elements, supports both focus and collaboration while keeping spaces visually light. MIX screens soften sound, maintain sight lines, and add just enough separation to make a difference—proving that small interventions can completely transform how a space works.
