Motum®
Teacher Workstation

Mobility, Versatility, Storage in One

Flexible classrooms require teachers – and their tools – to be on the move. Motum® Teacher Workstation offers mobility in a contemporary design that preserves practical storage features. The result is a nimble necessity with aesthetic appeal across the education continuum. Motum® makes a sleek office desk, too.

The Mobility Story

Teacher desks are personal basecamps. But they need to work in flexible classrooms. Using a wheelbarrow-type motion (glides on one side, lockable casters on the other), teachers can move their light-weight workstation almost anywhere.

Customize Your Station

We started with a stationary desk made from Smith's System's rugged steel frame and high-density board. Wire management is standard. Then we added popular options to customize.

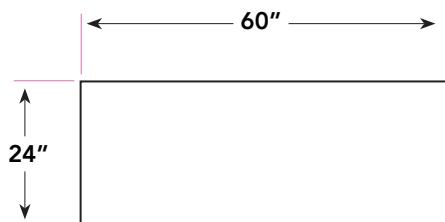

Choose from two desk sizes, three different end pedestals, and a right- or left-hand configuration – 12 models in all. Here's how.

1 Select Size

24 x 60-inch fixed-height desk with 90-degree edges.

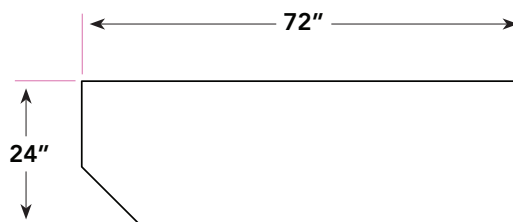

58003
Teachers Desk 60" w/
Totes, Left-hand

24 x 72-inch fixed-height desk with overhang for one-on-one tutoring. The extended surface is angled for optimum eye contact.

2 Pick an End Pedestal

Under-desk storage keeps materials tidy and secure. Pair either size desk with one of three, fixed end-pedestals with lockable front panel.

Adjustable Height Mobile Lectern

A 24x24-inch surface area adjusts from 30–44 inches, with tilt capability and built-in storage.

60" Left-hand,
Split-height

Three Tote Storage Pedestal

Drawers are Smith's Cascade Totes (available in two 3-inch and one 12-inch or six 3" totes) on easy-glide rails.

60" w/ Box &
File, Right-hand

3 Finalize the Finish

Platinum grey finish is standard for the frame. Choose from Smith System's 20 standard laminate colors for top and sides. It's easy to match with Smith's student tables and desks.

Go Solo: Motum Adjustable Height Mobile Lectern

Let teachable moments happen anywhere. Purchase Motum® mobile lecterns separately and roll them into learning commons, gyms, even outdoors. In higher-ed, roll lecterns between lecture halls. Speakers can easily adjust height and tilt features to their ergonomic sweet spot.
